ABS Consulting is a leading provider of risk management services with offices worldwide and more than 1100 employees. Our clients include Fortune 500, manufacturing, insurance, financial services, chemical processing, as well as federal, state, and local governments. ABS staff has developed unique tools to analyze natural and manmade hazards ranging from seismic, wind and flood risks to terrorist threats, explosion hazards, and physical security. ABS helps clients manage risks by identifying hazards, quantifying risks, and developing practical measures for reducing the impact to personnel and property.

Our San Antonio office specializes in the assessment of blast effects ranging from terrorist bombs to chemical plant explosions. ABS staff has extensive experience in blast modeling and a proven record in mitigation of blast effects through practical retrofits of structures and equipment. ABS conducts explosion testing to prove the effectiveness of blast mitigation products and retrofit techniques with special emphasis in glass hazard mitigation.

Products applicable for the following protective glazing applications:

- Safety
- Attack
- Blast Resistance
- Windstorms/Hurricane Resistance
- Seismic
