- ACCUNIT Pre-glazed Window Wall
- ACCQ-WALL Stick Curtain Wall
- I-WALL I-Beam Curtain Wall
- ARION Unitized Curtain Wall
- ACCEL Unitized Curtain Wall
- PATRIOT Blast Resistant Window Wall & Curtain Wall

Founded in 1989, Accura Systems Inc. provides engineering and manufacturing operations for window wall and curtain wall framing systems. The principle focus of the company has been in the production of aluminum and glass framing systems used for the exterior cladding of commercial buildings. Products include high performance window walls, curtain wall framing systems, skylights, and hurricane or blast resistant systems.

Accura Systems develops custom glass and aluminum walls from time proven concepts, following the design intent of each specific project, as prepared by the building's design professionals. Accura will design, engineer, extrude, finish, fabricate, assemble, and glaze all necessary components to provide a complete building enclosure package.

Accura Systems' manufacturing plant and administrative offices are located in Sunnyvale, Texas, USA. The facility consists of three buildings with a total area of approximately 200,000 square feet. Accura employs in excess of 70 full-time production personnel as well as approximately 35 engineering and administrative personnel.

Products applicable for the following protective glazing applications:

- Safety
- Blast Resistance
- Windstorms/Hurricane Resistance
