### **Product Line / Service Description**

- Safety, Security and Solar Control Window Films
- Armorcoat
- Armorgard
- SolarGard
- GraffitiGard

Bekaert Specialty Films offers a line of safety and security films whose primary purpose is enhancing the performance of installed glazing. These films vary in thickness from .004” (4 mi) to .014” (14 mil) and are installed on interior of the glass. These films are retrofit materials that can be installed with very little interruption to daily activity of the building.

These films, depending upon the thickness selected, can meet a number of tests that require the improving of the glazing. Some of these tests include:

ANSI Z 97.1

CPSC CFR 1201, Category II

GSA Standard Test for Airblast Loading on Glazing

Dade County, Small Missile- Impact and Cycling

Florida Building Code. Large Missile- Impact and Cycling\*

\* 100 MPH Windzone

### **Products applicable for the following protective glazing applications:**

- Safety
- Attack
- Blast Resistance
- Bullet Resistance
- Windstorm/Hurricane Resistance
- Seismic
