## Product Line / Service Description

Johnson Window Films' Trident Safety & Security Films offers glass protection to people and property. The films' durable polymer film construction and tough adhesive bonds to glass, creating a functional "safety net" that holds glass in place at impact. There are a variety of clear Trident thickness films to choose from plus shaded solar control options.

### Trident Protection Benefits:

- **Bomb Blast Protection:**  
Security film is an effective way to increase protection and reduce the glass hazard level caused by a terrorist bomb blast.
- **Natural Hazard Protection:**  
During hurricanes and tornadoes, safety research indicates security film can save lives and reduce property damage by preventing flying objects from penetrating windows.
- **Accidental Damage & Human Threat Protection:**  
Offers much needed glass protection against accidents and "smash and grab" robberies.

### Other Product Benefits:

- Solar films reject heat and cut glare
- Blocks 98% of harmful UV rays
- Scratch-resistant hardcoat
- Backed by JWF's warranty program

### Products applicable for the following protective glazing applications:

- Safety
- Attack
- Blast Resistance
- Windstorms/Hurricane Resistance
- Seismic
