Product Line / Service Description

- Blast Mitigating Products
- Forced Entry Resistant Products
- Ballistic Rated Products

McMullen Inc. specializes in servicing the protective glazing industry with blast mitigating products (fixed / in and out-swing / top-hung projecting / tilt-turn windows, curtain wall, and doors) and forced entry/bullet resistant applications (windows, curtain wall, and doors). Our complement of products also affords our clients the flexibility to accommodate their protective glazing needs with products that provide dual functions allowing applications to be both blast mitigating and FE/BR.

We “bring the architect’s design to life” as the company undertakes the full design and fabrication of the exterior facades of the simplest to the most complex of projects. With experience in U.S. and European markets, McMullen Inc. is in an excellent position to offer our customers the best possible product solution for any given project.

Products applicable for the following protective glazing applications:

- Safety
- Blast Mitigation
- Bullet Resistance
- Attack
