Product Line / Service Description

- Laminated glazing
- Insulating
- Heat-treated
- High-performance coatings
- Acoustical glazing
- Technical Services Department
- Protective Glazing Product Specialists

Blast Mitigation Product Line:

- Laminated Glass
- Insulated Laminated
- Double Laminated Insulated
- GuardVue (glass-clad polycarbonate)

Hurricane-Resistant / Wind Storm Protection Product Line:

- StormGuard™
- SentryGlas® Plus (SGP)
- HRG-2
- SentryGlas composite
- Laminated Glass (.060, .090 pvb)

Ballistic and Forced Entry Product Line:

- GuardVue™ (glass-clad polycarbonate)
- ViraGuard™ (laminated polycarbonate)

Viracon, an international company, offers the most complete range of high-performance architectural glass products available worldwide. We're a glass fabrication company with over 30 years of experience in the glass industry.

At Viracon, we offer a full line of protective glazing products, which may be designed to satisfy multiple threat requirements. Our protective glazing product line consists of four threat categories: 1.) Hurricane-

resistant glass laminates designed to meet the Florida Unified and International Building codes for large and small missile impact. 2.) Bullet resistant products successfully tested to Underwriters Laboratory and H.P. White test requirement. 3.) Forced-entry products that achieve WMFL and H.P. White criteria, and 4.) Blast mitigation products tested to GSA level C and level D, as well as the blast mitigation requirements of other government agencies.

In addition to being a single source supplier of these protective glazing products, Viracon is a complete design solution provider with the capability to incorporate high performance coatings, silkscreen patterns, tinted substrates, and insulating glass to achieve desired solar control, as well as, aesthetic appearance.

Products applicable for the following protective glazing applications:

- Safety
- Attack
- Blast Resistance
- Bullet Resistance
- Windstorms / Hurricane Resistance
- Seismic
